Mini-Com® Surface Mount Boxes

PANDUIT®

SPECIFICATION SHEET

specifications

Surface Mount Boxes shall have a low profile design and be available in a variety of port densities. Boxes shall accept most Mini-Com® Modules for fiber, copper, and audio/video applications. The boxes shall mount with screws, adhesive, or optional magnets. The box covers include breakouts for use with surface raceway. Cable tie slots shall be included to provide strain relief on incoming cables. Select boxes shall include spring-shuttered doors.

key features and benefits

Modular	Accepts all Mini-Com® Modules, which snap in and out for easy moves, adds, and changes
Low profile design	Presents a more discreet or inconspicuous look
Raceway breakouts	Compatible with specific raceway, conceals cable entering the box
Cover screw	Select boxes provide a screw that secures the cover to the base
Labels and label covers	Select boxes include a label pocket to meet TIA/EIA-606A labeling standards
Magnet pockets	Magnet can be used with magnet pocket for optional mounting (CBX1**-A does not include a magnet pocket); CBM-X for used with standard boxes, CSBM-X for use with shuttered boxes
Shuttered feature	Select boxes include spring-shuttered doors to protect connections from dust and debris

applications

Mini-Com® Surface Mount Boxes offer a variety of mounting options, allowing Mini-Com® Modules to be mounted on a variety of surfaces, such as standard walls, metal surfaces, office furniture, etc. Surface mount boxes include breakouts compatible with Panduit's Raceway system to conceal and allow cable to run into the box providing a point of connection for voice, video, and data applications.

Mini-Com® blanks can be used to reserve space for future expansion.

Shuttered surface mount boxes include a spring-shuttered door that will protect the connections from dust and debris. The 6-port deep shuttered box is deeper and includes a routing bridge to help route the cables and protect the bend radius.
