

100 PAIR CONNECTION BOX

300 Series Box

320mm x 210mm x 120mm (standard lid)

The Austin Taylor 300 Series Modular Box is a versatile plastic box designed to contain various back mount frames and mountings for ancillary components.

The base has generous provision for fixing of cable tie anchors, jumper rings, earth posts and connector mountings.

The cover gives an internal clearance height of 90mm and will accept the QDF-modules and the BMF & LSA+modules strips with the addition of protector module.

The cover is secured by large head quick release screws and has removable side and end panels. The end panels have breakout sections for cable entry.

The 300 Series box can be used singly or in multiple configurations when the bases are fitted together and the appropriate side or end panels removed.
