TECHNICAL SPECIFICATIONS- All models

Woofer:	5" paper
Rated power:	RMS 6W
Transformer taps:	6W, 3W, 1.5W
Frequency response	(-10dB): 200Hz to 20kHz
SPL1W / 1m:	92dB
SPL1m / max rated power:	99dB
Dispersion at 1kHz, 4kHz, 8kHz:	180°, 80°, 40°
Color:	no RAL color. Grey color approaches RAL7038, white color approaches RAL9003
Chassis type:	ABS plastic
Grill construction:	Metal
Dimensions:	202x142x72mm
Max wire size diameter:	2,5mm ²
	IP50 indoor use only
Net weight:	from 0.8 Kg to 1 kg
Gross weight:	0.9 Kg to 1.1 kg

TENDER TEXT

The SM series is a line up of functional on-wall cabinet speakers. All speakers have a 5" paper woofer, and are equipped with 100 Volt power transformer with power taps on 1.5/3/6 Watts. This speaker offers an excellent sound quality and a no-frills design with a ABS plastic housing and metal grill.

The SM series is available in white and grey, with or without bracket, with or without a volume control hidden under the logo shield, or as model with priority relay.

For models with volume controller: The volume controller is hidden discretely under the logo shield, which avoids unwanted tampering with the volume setting.

For models with bracket: Thanks to the mounting bracket, the speaker can be installed under an angle on ceilings, walls, columns,...

For models with priority relay: The 24 Volt priority relay allows priority paging calls to go through, even when the volume button is in the "zero" position.

The SM series has all the options for professional use in public buildings, schools, parking garages, supermarkets...
