

## Mèches de perçage Euroboor

Euroboor dispose du plus grand assortiment de mèches pour carottage tant en ce qui concerne les dimensions que le matériau utilisé. Il est possible de choisir entre des mèches en acier rapide (HSS), en cobalt 8 et aussi à embouts en carbure de tungstène (métal dur)

Les mèches Euroboor sont faites d'un acier avec certificat, produit dans un équipement moderne à commande numérique (CNC). Un contrôle est effectué après chaque phase de production

Les mèches d'Euroboor assurent un travail de perçage rapide et sont en même temps d'une grande robustesse

Démarrage parfait sans dérapage

Paroi intérieure conique meulée

Centrage précis

### Euroboor

#### Mèches HSS - emmanchement Weldon 19 mm

**Remarque:**

- Profondeur de perçage 30 mm: type de mèche HCS
- Profondeur de perçage 55 mm: type de mèche HCL
- Profondeur de perçage 75 mm: type de mèche HCY
- Profondeur de perçage 100 mm: type de mèche HCX
