

Battery Powered Smoke, Heat Alarms

R200x

APPLICATION

Honeywell Home heat and smoke alarms are designed for all types of residential property, including leisure accommodation, guest houses and caravans.

Help protect your customers from what they can't see.

Many dangers in the house are hard to detect before it's too late, domestic fires and carbon monoxide poisoning are amongst them.

Improved safety standards and new regulations (especially around the installation of smoke alarms) have greatly reduced the consequences of domestic fires but smoking and cooking remain the most common causes.

Both the EU and UK governments recommend fireproof household material, appliances and furniture in homes, these generate a lot less smoke than standard materials, which leads to smoke detectors taking longer to alert of fires in the home.

Fires can also breakout at night, making reliable detectors and alarms essential to alert homeowners when they're less likely to notice danger themselves.

"ONE GO, ALL GO" TECHNOLOGY

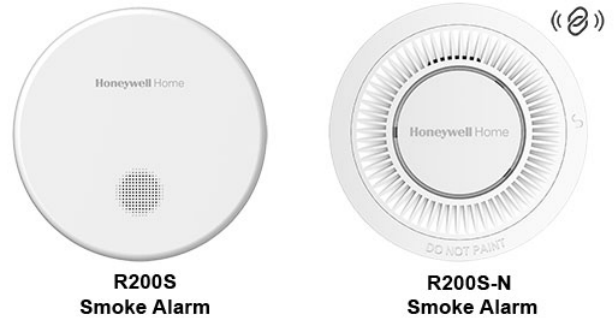

The alarms offer even more protection when they work together. The range of interconnected alarms can be wirelessly linked to each other, so when one alarm goes off, they all go maximising the alert in the event of an activation. Installing an appropriate alarm, in the right place, could help save your customers' lives.

APPROVALS

- CE
- NF
- VdS
- UKCA
- Kitemark
- B-Mark
- Q label
- SBSC
- EN 14604:2005 + AC:2008
- EN 62368-1:2014
- BS 5446-2:2003

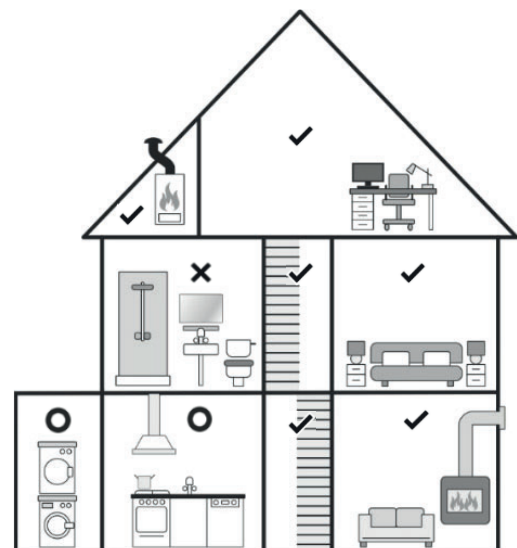

SPECIAL FEATURES

- Alarm memory
- 10 year lifespan / warranty
- Super slim smoke alarm design
- End-of-life signal
- Alarm hush for 10 minutes
- Fault hush for 9 hours
- Tamper-proof optional
- The interconnected alarms to assure one-go-all-go feature - R200S-N, R200S-H, R200ST-N only
- High decibel alarm (no need for caps)
- Automatic self-test
- Do not disturb mode at night (Smoke)

INSTALLATION GUIDELINES

- ✓ Recommended
- ✗ Not recommended
- Use heat alarm
