

# Charge Amps Beam

Tough against harsh weather, and smoother to use than ever. Charge Amps Beam is the perfect companion for your charger.

## The benefits

- A robust cable that withstands tough handling
- Easy to use in all weather conditions, withstands temperatures between -30°C to +45°C
- Available in three different variations: 7.4 kW / 13.8 kW / 22 kW
- Six meters long for optimal reach
- Unique complete moulded ergonomic handle, avoiding sand and moisture to get in

## Compatible with

- The cable is compatible with most electric vehicles

### A cable more than capable

The cable Charge Amps Beam is six meter long which in our opinion is an optimal length, to easily reach the charging station, while being easy to handle and easy to store. It has an ergonomic, moulded handle provides a firm grip while keeping dirt and moisture out.

### Smooth from hot to cold

Charge Amps Beam is designed to withstand the toughest of weather conditions. It can handle both high and low temperatures, and is bendable even at low temperatures. All for a safe and trouble-free charging experience, regardless of where in the world you live.

#### Technical specifications
